

Status Report Tier 2

Vizeng:

- Added requirements
- Updated HomePage (index.php)
- Created geoJson file layer to work in the map
- Update geoJson file layer
- Test Data

Nong:

- Added requirements
- Added User Guide
- Added Status report
- Updated meeting notes
- Test Data

Bijesh:

- Added requirements
- Updated HomePage (index.php)
- Added two layers of geoJson file, one with the presidential district and second with the winning party.
- Added interaction in the map so when a user hovers around a certain area, the information about the district and the winning party shows up
- Tested the interaction and the geoJson file data

Whats Next

- Start on graphing algorithm for iteration 3 and presentation for iteration 4
- Also complete the rest of the maps based on what maps we want.
- Add 4 more maps with different districts such as presidential, senate etc.
- Work on presenting the data from database into the map and add interaction.
- Clean the code and add comments at the end of the completion.
