User Guide

GerryMandering Project User Guide
By: Vizeng Lee, Bijesh Bajracharya & Nong Xiong

1. **Introduction**

This user guide was created by Nong Xiong, Bijesh Bajracharya and Vizeng Lee for ICS 499 Capstone course.

2. Objective

The objective of this project is that we had taken the data from MN elections and visually show the redistricting problem to anyone who views this application in an interactive map.

3. How To

User goes to our site to analyze the precinct results from different districts of Minnesota. There is an interactive map that the user can view. Users will use the mouse to hover around a district and it would display what district it is in, name of the county and the winning party (Republican or Democrat). User can choose their desired precinct or district and the information will be displayed.
